EXPERIENCE

Oracle

Software Engineer I

Hyderabad, India

July 2024 – Present

JavaScript, React, Angular, Flask, SQL

- Served as the **primary developer** in migrating a legacy data export system to a parallelized processing model, handling **1M+ records** per run (~**200MB** payloads); reduced execution time from **~14 minutes** to **~2–5 minutes** (**60–80%+** improvement) and eliminated timeout failures under strict execution limits.
- Built a critical self-serve mapping workflow for a product serving **~2.3K eligible customers**, removing the need for PS/TS and support teams to handle mapping setup manually; reduced onboarding mapping turnaround from **~1 week** to **under 1 hour** and supported typical customer configurations involving **100+ mappings** with no hard system limit.
- As **1 of 2 developers**, reverse-engineered external OIC mapping workflows and replicated them **via APIs**, implementing payload generation, transformation logic, conditional routing, and bidirectional mappings; reduced setup time for a **complex mapping** from **~20 minutes** to **~1–2 minutes** and for a **simple mapping** to **~30–40 seconds**.
- Improved inbound-shipment processing reliability by implementing a purchase-order sync workflow and fixing backend defects, reducing sync failures by **~80–90%** and stabilizing production usage across **1000+ customers**.

EDUCATION

VNR Vignana Jyothi Institute of Engineering and Technology

Bachelor of Technology in Computer Science and Engineering | **CGPA: 8.6/10.0**

Hyderabad, India

Nov. 2020 – Apr. 2024

PROJECTS

AI Resume Optimizer | Next.js, TypeScript, MongoDB, Tailwind CSS

[GitHub](#) | [Live](#)

- Built a full-stack **Next.js** application for AI-powered resume analysis, job-description alignment, and ATS-friendly resume building, with authentication, **MongoDB**-backed user persistence, and subscription-gated workflows.

Algorithm Visualizer | TypeScript, React, Data Structures & Algorithms

[GitHub](#) | [Live](#)

- Built an interactive **TypeScript/React** application for sorting and pathfinding visualization, with deterministic execution timelines, step-by-step playback, and live metrics for clearer understanding of DSA concepts.

TECHNICAL SKILLS

Languages: C++, JavaScript, Python

Frameworks: React, Angular, Node.js, Express.js, Flask

Tools & Platforms: Git, Docker, Postman, NetSuite, Salesforce, Oracle Integration Cloud

Databases: Oracle, MySQL, MongoDB

Core: Data Structures and Algorithms, Computer Science Fundamentals, System Design Fundamentals

CERTIFICATIONS & ACHIEVEMENTS

Smart Coder (DSA) Program | *Diamond Certificate, Smart Interviews*

[Link](#)

3rd Place in VNR VJIET nationwide coding contest | *Among 600 teams*

[Link](#)

4th Place in Megathon 2022 | *IIIT Hyderabad nationwide hackathon, 500 teams*
